

BULLDOG

BDG CL3000

DP Generators Buying Guide

The Bulldog CL3000 is a 2.8Kva **petrol** engine generator in an open frame with a recoil start. The machine has a long run fuel tank and is capable of a full days work. This unit is durable and built for constant use. The CL3000CW has a low oil shut off feature for engine safety. A real winner and popular amongst professional users.
